Offshore Wind Power Era is Coming

Building a Barometer of Global Offshore Wind Power

Global offshore wind market has been booming in recent years. The CAGR (compound annual growth rate) of global offshore wind market will be 17% between now and 2030, and the cumulative installation of global wind power will arrive at 154GW in 2030, which is 19% higher than the estimate in the offshore wind power market outlook report released in the first half of 2018.

China's offshore wind power installation has been growing rapidly for five consecutive years. With installations of over 4 GW, China is now ranked the third behind UK and Germany. The rapid development of emerging markets like North America and Asia not only makes offshore wind power a new source of market growth but also will bring about substantive purchase of products. According to RenewableUK's estimate, the market value of array and export cables alone will be close to 14 billion pounds in 2028.

As a pioneer in offshore wind power, Europe has been dominating the field. By strengthening China-Europe communication in offshore wind power, we can study advanced technologies and successful development modes from Europe and lay a solid foundation for jointly developing emerging markets of offshore wind power in the future.

CWP Offshore is a part of CWP 2019 and will perform as a platform for communication and cooperation. It aims to be a barometer of offshore wind market.

Highlights

Relying on CWP, a top international wind power event, CWP Offshore has attracted world-leading offshore wind turbine manufactures as soon as it's established. With 60,000 professional audience at home and abroad, of whom 33% are decision-makers, we'll provide great opportunity for you to meet high-quality buyers in the offshore wind power industry.

We welcome you to share the event with 214 international manufacturers and five international exhibition groups. You can better display your brand image, expand your publicity channel, and further explore cooperation relations and target markets.

The summit to be held concurrently with the CWP Offshore invites world's top business leaders and technical experts to discuss hot topics on offshore wind power and cutting-edge technologies, which will help you see business opportunities and grasp advanced information of the industry.

CWP Offshore is not only an exhibition but also a comprehensive service platform where customers can receive customized services, make appointment for business negotiation, participate in supply and demand docking, obtain information, explore business opportunities and make more contacts.

Exhibitors

Five International Exhibition Groups

There will be more brands at the site.

Join us now

You'll see the most advanced sci-tech products, the most professional technical presentations, and the most comprehensive industry information. All quality resources and cooperation demands in global offshore wind power industry will be met here. A number of manufacturers, business leaders, buyers, innovative developers and investors will gather at CWP Offshore to get the latest industry information and innovative technologies, explore business, and seize market opportunities.
